12/18/19 - 12/20/19

sUAS Operator: Daniel Mayfield
Part 107 Certification Number: 3957858

Objective:
To capture aerial video, as directed by the client, at the private property of the AV Sandlot, of the two Dodge RAM trucks in off-road terrain.

Flight Mission Brief:
- Date | Timeframe: 12/19/19 - 12/20/19 | sunrise to sundown
- Max Altitude: 400 ft AGL (Above Ground Level)
- Operating Altitude: 5 ft AGL - 350 ft AGL
- Orbit Radius: Approximately 50 ft from the Trucks center point.
- Landing Zone: The landing zone will be clearly marked with giant orange landing pad. This location will be clear of any main flow of foot traffic or vehicle traffic. Pilot & Visual Observer will be operating at a safe distance to the subjects with a clear line of sight of the sUAS.

Flight Plan:
There are several shots that the client wants executed. The primary shot will start with the sUAS leading one of the trucks while the truck is moving forward and the sUAS will increase elevation to reveal the second truck behind the first. The second shot discussed is a profile shot of the truck (one at a time) in different terrain. The sUAS will track with the truck as it moves down the dirt road. The last shot will be a birds eye view view of both trucks driving through the frame. The sUAS will be static for this shot.
